

# MOLYGULF SPECIALIZED LUBRICANTS

Ultimate High Performance Specialty Lubricants

## FG-150 USDA H1 FDA APPROVED MACHINE OIL (-65 C)

**FG-150** USDA H-1 FDA Approved Paraffin Oil are highly refined medicinal grades, that are water white in colour, odourless and tasteless. These products are extremely stable and will not break down or form sludges.

### Applications:

This product may be used as a release agent (Category 3H) on grills, ovens, loaf pans, boning benches, chopping boards, or other hard surfaces in contact with meat and poultry products to prevent food from adhering during processing. Both products can be used in applications where there is the potential for incidental food contact, in or around food processing areas, including:

- Protective anti-rust film on food processing equipment.
- Release agent on gaskets or seals on tank closures.
- Lubrication of machine parts.

**Note:** Always use the minimum amount required to achieve the desired technical effect. If used as an anti-rust film, the product (s) must be removed completely before the equipment is used to eliminate any transfer to food material.

### Qualifications:

**Crystal Heavy Oil:** Category Code: H1, HX-1
